

Dear Partners,

Following the recent conclusion between Transgaz and Vestmoldtransgaz of the Amendment to the Interconnection Agreement and the updating of the Common Method for determining capacity in IP Ungheni, we inform you that starting with 01.10.2021 the technical capacity of IPI Ungheni in both flow directions will be available to the market at a higher level than is currently available, as follows:

- in the direction **Romania** → **Republic of Moldova**, the maximum technical capacity will be at the level of 5,076,000 cm/day (0 °C), respectively 57,542 MWh/day (15/15 °C)

- in the direction of the **Republic of Moldova** → **Romania**, the maximum technical capacity will be at the level of 932,000 cm/day (0 °C), respectively 10,543 MWh/day (15/15 °C)

The capacity available in PI Ungheni, for the gas year 2021-2022, can be reserved through the GMOIS Platform, owned by Transgaz, according to the capacity allocation method "first come-first served", according to the provisions of the Network Code.

Network users may request firm capacity products at the mentioned level, starting with 5 July 2021, when, according to the provisions of the Network Code, the booking of annual firm capacity products begins.

Yours sincerely,

SNTGN Transgaz SA
