on the proposal for the gross dividend per share and for the means of dividend pay-out for the financial year 2021

S U M M A R Y

The approval of a gross dividend per share amounting to LEI 15.61, determined based on the provisions of *Government Ordinance No. 64/30 August 2001 on the allocation of profits within national companies and trading companies fully owned by the state or where the state is a majority shareholder and within the autonomous administrations* in the context of the application of a share of **90.04007%** upon the distribution of profits in the form of dividends, in accordance with the provisions of Article IV of GEO 3/26 January 2022 *for the modification and completion of Government Emergency Ordinance no. 118/2021 on the establishment of a compensation scheme for the consumption of electricity and natural gas for the cold season 2021-2022, as well as for the completion of Government Ordinance no. 27/1996 on the granting of facilities to persons residing or working in certain localities in the Apuseni Mountains and in the "Danube Delta" Biosphere Reserve:*

- (1) *Notwithstanding the provisions of Article 1 para. (1) letter f) of the Government Ordinance no. 64/2001 on the distribution of profits of national corporations, national companies and commercial companies wholly or majority owned by the State, as well as autonomous administrations, published in the Official Journal of Romania, Part I, no. 536 of 1 September 2001, approved with amendments by Law no. 769/2001, with subsequent amendments and additions, for the financial year 2021, in the case of companies with wholly or majority state capital, as well as in the case of autonomous administrations set up by the state, the accounting profit remaining after deduction of corporation tax shall be distributed in an amount of at least 90% in the form of payments to the state budget in the case of autonomous companies or in the form of dividends in the case of companies with wholly or majority state capital, in accordance with the law*
- (2) *In duly justified cases, the Government may approve by decision the distribution to the state budget, in the form of payments to the state budget in the case of autonomous administrations or in the form of dividends in the case*

of wholly or majority state-owned companies, of less than 90% of the accounting profit remaining after deduction of corporate income tax, but not less than 50% thereof.

Distribution of 50% of the net profit of S.N.T.G.N. Transgaz S.A. in 2021 in the form of dividends would make an important contribution to ensuring the source of financing needed by Transgaz to carry out the strategic investment projects included in the company's development programme approved by the National Energy Regulatory Authority and the extensions of the natural gas transmission pipeline system intended to connect the country's localities to the National Transmission System, with a major positive impact on increasing the population's standard of living and the degree of development of the local authorities, as well as increasing the safety of the operation and functioning of the National Transmission System (NTS), which is why the company requested the supervisory authority to support the investment activity of SNTGN Transgaz SA by taking steps to initiate a Government Decision approving the distribution in the form of dividends for the financial year 2021 of 50% of the accounting profit remaining after deduction of corporate income tax.

At the time of drafting this report, no Government Decision has been issued in accordance with GEO 3/26 January 2022, art. IV, paragraph (2), which is why the proposed distribution of net profit in the form of dividends has been made, in accordance with GEO 3/26 January 2022, art. IV, paragraph (1), in a proportion of 90.04007%.

The share under Transgaz' revenue and expense budget for 2021, as approved by OGMS Resolution 3/27.04.2021, was 50%.
