QUARTERLY REPORT

ON TRANSGAZ ECONOMIC AND FINANCIAL ACTIVITY

This report analyzes the indicators obtained in comparison with the indicators estimated in the income and expense budget approved by Government Resolution no. 302/29 May 2013.

The main economic and financial indicators for the period analyzed compared to the corresponding period of year 2012 are listed in the table below:

The total income obtained represents 105.25% compared to the corresponding period of year 2012, which is higher by 53,347 thousand RON. The increase of the income was due mainly to a capacity booking tariff higher than the capacity booking tariff for the corresponding period of the previous year.

From 1 January to 30 September 2013, compared to same period of the previous year, the income from international gas transit service decreased due to a lower RON/EUR, RON/USD respectively, average exchange rate.

Financial income was lower due to the decreasing of the bank deposits of the company compared to the corresponding period of the previous year.

The total costs were 116.43% achieved compared to the same period of year 2012, which is higher by 116,336 thousand RON and were influenced mainly by the setting of the tax on natural monopoly in the field of electricity and gas, according to Government Ordinance no. 5 of 22 January 2013, and also by the technological consumption gas procuring costs savings.

The financial costs were higher by 98,221 thousand RON due to the financial assets depreciation provision (110,671 thousand RON), representing Transgaz's contribution to the share capital of Nabucco Gas Pipeline International GmbH, following the non-selection of the Nabucco West project as gas transmission route.

As compared to the same period of year 2012, the gross profit is lower by 20.41% (62,989 thousand RON) and the net profit is lower by 37.27% (94,758 thousand RON).
